

Wireless Powers America

Wireless Blankets the Nation

There are more wireless devices than people in the U.S. and consumers benefit from robust networks that offer widespread coverage. 5G's nationwide rollout was 42% faster than 4G.

Wireless Invests in America

The wireless industry invests billions of dollars into their networks—which betters communities across the country. The wireless industry has invested \$705 billion, including \$30 billion in 2023.
